Art Unit: 2833

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

Claims 1-16 are objected to because of the following informalities: in claim 1, line 2, -- thereof -- should be inserted after "underside"; penultimate line, "having" should be -- has --. Appropriate correction is required.

Claims 1-16 contain subject matter which defines over the art of record.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record discloses or teaches sliding elements for blocking the bus bar receptacles in a thickness direction, and bearing inserts for blocking the bus bar receptacles in a transverse direction, in combination with the rest of the subject matter of the independent claim.

The references cited on Form 892 disclose similar bus bar supports.
